## WORK HISTORY

### BOTANIX LABS

CHIEF SECURITY OFFICER (CSO) | 2024 - 2025

Led comprehensive security review of blockchain infrastructure including binary analysis, execution layer security assessment, and consensus layer evaluation using CometBFT. Successfully launched mainnet in July 2025 with zero security incidents. Established enterprise-grade internal security program including security policies development, password manager deployment, multi-factor authentication implementation, and incident response procedures. Conducted threat modeling and security architecture reviews for distributed systems.

### CASA, LLC

HEAD OF SECURITY | 2020 - 2024

Protected enterprise assets, personnel, and information technology infrastructure securing over \$4 billion USD in Assets Under Protection including customer funds, corporate treasury, and cryptocurrency holdings. Implemented comprehensive cybersecurity training programs featuring hardware security keys (Yubikeys) and GPG encryption protocols. Served as Data Protection Officer managing GDPR compliance, data subject requests, and third-party breach notifications. Established security review processes and vendor risk management frameworks.

### SHAPESHIFT AG

SENIOR SECURITY ENGINEER | 2018 - 2020

Conducted security analysis and penetration testing of blockchain technologies and cryptocurrency exchange infrastructure. Performed source code security reviews for vulnerability identification and security best practice implementation. Managed multiple security projects using Atlassian JIRA and Confluence platforms. Led high-profile incident response activities including recovery of over \$1 million USD in stolen cryptocurrency assets. Chaired Access Review Committee and Responsible Disclosure Board. Served as Master of Key Generation Ceremonies for cryptographic key management.
